Got on sale for 2\$ and completely recommend for the price.

Rained on Easter so this was a perfect alternative. It is glitchy and not so visually appealing, but does what it says on the tin. Perfect if you just wanna pretend you're hunting eggs.. Really enjoyed the game! My favorite of yours so far :D Keep it up!! I did a little let's play where I just run in circles and get scared by my own movements x)
<https://www.youtube.com/watch?v=Pfghwtj28U>. Awesome pixel graphics and sound effects/music, together with good depth but easy to pick up gameplay, make this a great game.

Loads of different attack and defence moves and these can be upgraded too.

Well designed game mechanics and UI make this fun to play.. Game has not been updated and the dev hasn't communicated in a long while. I don't recommend buying this game in it's current state as it is still very incomplete.

EDIT: The game is now being worked on again so these statements are no longer valid, I will play through it again at somepoint to give a proper review of the complete experience. It's free content that adds more variety of weapons and skills, there are literally no downsides.. Sydney Character Pack

The Anarchist Perkdeck is a pretty good perkdeck, you can even create a dodge build using it, even when Anarchist Perkdeck was an Armor-based Perkdeck. The Bootleg Rifle is one of the best AR i'd rather use an actual LMG. and introducing Sydney, the youngest heister.

She can be your waifu too

8.3/10. Disclaimer: have had this for a while, but haven't played it much as it can get really frustrating, but that's my fault, not the game's. Really well put together, simple(ish) stage-based game, but awfully difficult for plebs like myself that can rage against the machine (see what i did there?). All in all, worth the price you pay, be it on sale or not. Very simplistic ui, puzzlers will find it engaging and slightly addictive, but only if you crave a good challenge and want a sense of accomplishment if and when you complete a stage.

Get this if you want what it adds to the game. I recommend it for those who want more humanoid races (looks like human\body structure of a human) and ships that are based off of Sci-Fi and other stories\genres.. Combining a SHMUP with idle game it's not a bad idea, unfortunately, this game implements it badly, especially for those using mouse and keyboard. The shooting part seems like something that was tacked in at the last minute, with awful controls, no option for customizing graphics, no option to lock the mouse to the window, which causes problems for anyone with dual monitors, a complete disaster.

If they fix some of those issues, I might rewrite this and change my recommendation. But for now, I uninstalled it and recommend that you don't waste your time. There are better SHMUPs for cheap and idlers for free out there.. I bought this on the release. I spent days and nights playing it, getting 57 hours in a week. This has taken my life over. Really good game though.. I got this app on sale for \$1.59 USD in a recent Steam sale. Is this app worth that much? I think so, but just barely. The main problem with this app is that the graphics \ cinematic experiences are very low quality. These are PS2 \ Xbox 360 level graphics. It really takes away from the experience.

Each of the 7 experiences did load for me without any problems (although exiting was another matter, I had to quit the app to get out of each experience). Each experience lasted from 2-3 minutes each. So there isn't a lot of content here. The narrator gives some interesting factoids, but even the backstories for each of these 7 wonders is very limited.

So if you're really curious about the 7 ancient wonders, then I think I can recommend this app. Honestly, nobody will probably recreate this experience. So it's the only game in town, even if it's not particularly well done.

Sale Price Rating: 5\10 buy for the educational experience on sale only if you're really interested in the subject matter. Can't comment on the game as it crashes about a minute in. Tried some workarounds listed in the forum. They don't work for my system. Developer has known about the crash for almost a year, it seems, with no fix. Don't waste your money if you have a GTX 1080 like myself.. 90s 300zx !

Perfect. Passed my theory test today with a score of 50\50! This app helped me a great deal and I would recommend it to anyone wanting to pass their test first time.
